

SPEAKER BIOGRAPHY

Speaker: David C. Oehl, P.E.

Abstract: “Five Simple Steps to Immediately Determine Industrial CHP Viability”

Session:

BIO:

David C. Oehl serves as President of Maven Power LLC based in Houston, TX, which supplies engineering, equipment and services for both domestic and international on-site power generation projects. Maven Power specializes in CHP projects including feasibility studies and EPC contracts.

David is currently licensed as a professional engineer in multiple U.S. states. He has over 20 years’ experience in technical and project management for on-site power generation for the industrial, utility, oil & gas, and hospitality markets. David is a published author on CHP and power generation industry practices. He holds multiple engineering degrees from Baylor and Texas A&M Universities, where he was also a Division I athlete.

David enjoys international culture having been to over 60 countries on six continents, and is fluent in Spanish.
