

Susan Wickwire is Chief of the Energy Supply and Industry Branch in the Climate Protection Partnerships Division of the U.S. Environmental Protection Agency. She manages two of EPA's voluntary climate change programs - the Green Power Partnership and Combined Heat and Power (CHP) Partnership. Both engage a range of companies, communities, universities and other organizations in reducing greenhouse gas (GHG) emissions. She also oversees the Center for Corporate Climate Leadership which supports effective corporate GHG management. She previously served at EPA as the Acting Director of the Climate Protection Partnerships Division and as Chief of the International Capacity Building Branch.

Ms. Wickwire has been in federal government service for over 22 years, both at EPA and the U.S. Department of State where she also worked on climate change issues.

Ms. Wickwire holds a Masters in Public Administration from the Maxwell School at Syracuse University and a Bachelor of Arts in Political Science from Whitman College.
